

Secure and Streamlined Telehealth Triage Services for Medcor clients

MedCall Telehealth Triage

MedCall seamlessly works with your partner Medcor to connect injured workers with Emergency Physicians immediately following the nurse triage session.

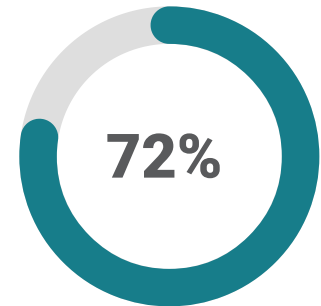

Easily access care anytime, anywhere by phone or app

MedCall is partnered with Medcor to deliver a unique telehealth triage experience. Only MedCall offers phone and video-based telehealth triage access to dedicated Emergency Medicine physicians for work-related injuries. As employers face the urgency to do more with less, the need to offer workers quick, convenient, and seamless quality emergency care is essential.

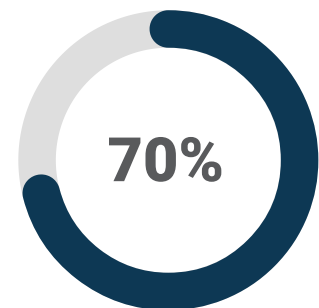

MedCall's platform gives your workers 24/7 access to an emergency physician, saving both time and money. And with our dedicated integration with Medcor's CarePath platform, all caller data is transmitted securely between nurse and physician, and all reports delivered to authorized recipients.

Features that matter
