

# MedCall Quick Connect

## For Injury Reporting and Telehealth

Workplace injuries are both costly and challenging to manage. Injured employees may ignore their injury due to uncertainty around process and cost to them, or “over-address” by going to the Emergency Department when it could be solved with a discussion with an Emergency physician.

In an environment where an average emergency room visit costs between \$1200 and \$2000, these care decisions are critically important to the cost and efficiency of your workers’ compensation policy.

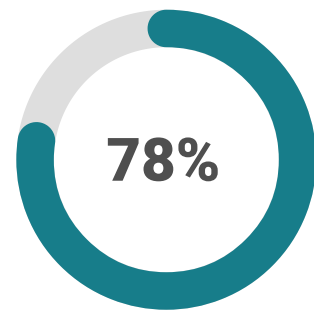

### What if you could better manage the costs of workplace injuries for your clients?

### Help your clients save money and take care of their employees while creating a competitive advantage for your organization.

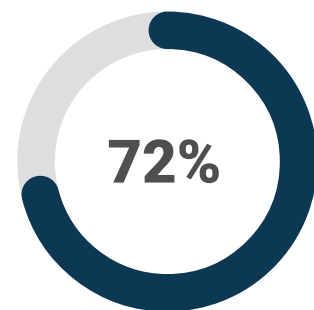

MedCall provides 24/7, on-demand, phone and video-based access to board certified Emergency Physicians for your clients’ workers compensation injuries, saving both time and money. You’ll be in a better position to meet your clients’ needs and ensure they achieve their financial goals.

With MedCall you get:

- 24/7/365 claims intake and immediate medical care
- Board Certified physicians who specialize in Emergency Medicine across all US states
- Support for Emergent and Non-Emergent events
- Direct referral to in person care when necessary
- Physician follow up available
- Detailed FROI and FNOL reports transmitted to carrier/TPA and employer as applicable
- Translation support available in all major languages

of visits resolved without being seen in person

of employees returned to work after visit

average direct medical cost savings per MedCall telehealth triage call

## And now, MedCall is offering a new “Quick Connect” package designed to get you up and running with minimal effort, cost, and disruption.

This new package delivers the same benefits as a standard implementation, while allowing you to test the service and realize rapid value:

- No “all or nothing” rollout: you choose the insured(s) to deploy this service
- Minimal \$1,000 set up fee: covers the set up of insureds’ policies, physician panels and rules, and customized marketing materials to promote the service to the insureds’ employee population
- No monthly maintenance fee: pay only for the detailed FROI reports and telehealth visits
- Monthly ROI reporting
- No contract lock-in: after the dedicated Quick Connect period, you decide how to continue with the service
- Pricing models include Fixed and Tiered models

### 3 Easy Steps to Essential Care

Work injuries can be overwhelming.  
We’ve made it easy

**1**

#### NOTIFY

your supervisor immediately

**2**

#### CALL

MedCall at 855-963-3225

**3**

#### REPORT

your injury & speak with an  
Emergency physician via audio  
or video

An easy-to-use mobile app is available  
in the iOS and Google app stores.

“MedCall Advisors’ telemedicine service provides our member companies with an option for over the road truck drivers to have access to a board-certified physician even when they are away from their home location. Our experience has been that this prevents drivers from seeking unnecessary treatment at a local ER for non-emergency injuries, thus saving our member companies money and often avoiding OSHA recordable injuries. ”
